

Models of Child Health Appraised

(A Study of Primary Healthcare in 30 European countries)

FINAL CONFERENCE - PRESENTATION OF RESULTS

15-16th November 2018

The Hague, Netherlands

This large **EU Horizon 2020** Research Project has for three years been working to identify and critically assess all aspects of primary health care provision for children of all ages in the **30 EU and EEA countries**. The work by **20 scientific partners** concludes at the end of November, based on evidence from all 30 countries and external sources. This concluding event will share the headline results, introduce the formal reports, and enable stakeholder discussion on next steps after the project's conclusion.

✓ **Presentations on key MOCHA Findings**

Invisibility of Children in Data and Policy Systems; Measurement Challenges; Listening to Young People; Vulnerable Children and Equity; Delivering Complex Care; Patients and Primary Care Interfaces; School and Adolescent Health Services; Health Workforce in Child Health; Education of the Child Health Workforce; E-Health as the Enabler Optimal Service Models

✓ **The Way Forward for Primary Child Care Health in Europe**

Understanding Child-Centricity; Bringing MOCHA Results to Local Services; Contextualising into European and Professional Initiatives

✓ **Opening Remarks**

Dr. Martin Weber – Child and Adolescent Health, WHO European Regional Office &
Prof. Jet Bussemaker – former Minister of Education, Netherlands

Limited spaces available. For more information and to book your place, please go to the project website at <http://www.childhealthservicemodels.eu/>. If you have any questions at all, please contact MOCHA Project Manager Christine.chow@imperial.ac.uk.
